### MISSION

Our mission is to give light for a better and more healthy life.

Driven by the global development of technologies and in close collaboration with our partners, we create, produce, and deliver competitive, high-quality, sustainable lighting products and services.

### VISION

At Electrostart JSCo, we are determined to make modern lighting technologies accessible to everyone.

With generations of experience and worldwide recognition for more than 55, we produce high-quality and efficient lighting products with the "Electrostart" brand.

We strive to expand our global presence by offering efficient LED solutions and intelligent light management.

Our vision for achieving success is expressed in continuous development and applying standards for environmental sustainability, high professionalism, corporate integrity, and transparency in our actions.

Through our activities, we contribute to the general well-being, to the development of our employees, and to the socio-economic progress of the region and Bulgaria.

### LEADING EUROPEAN MANUFACTURER OF SIGNAGE INDUSTRY SOLUTIONS

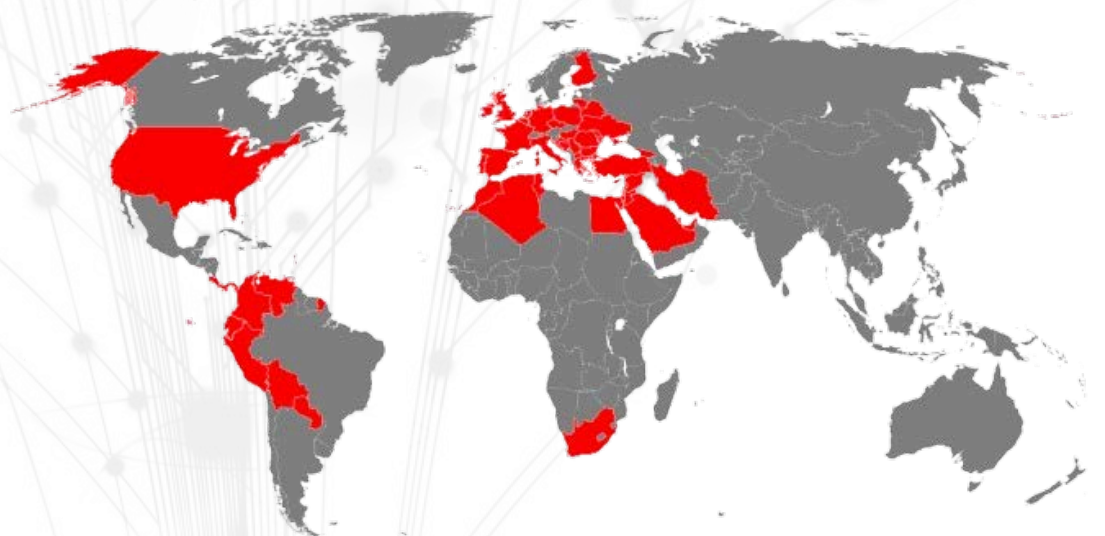

We are an European manufacturer specializing in high-quality products for the signage industry.

Since 2003, when we made our first sales of FL ballasts for signage applications, we have been committed to innovation, reliability, and excellence. With decades of experience, we provide cutting-edge solutions that power illuminated signage, ensuring efficiency and durability.

Our products are trusted by professionals across the industry, making us a preferred partner for high-performance signage components.
